The Democratic Union of Zimbabwe

Our political party identifies itself with Democratic ideologies and philosophy. At the foundation of our organization is Zimbabwe first, and the three pillars that hold our shared values are:

- **Prosperity,**
- **Justice,** and
- **Modernization.**

On the measure of the political spectrum, our party would find itself more centre than most left-wing politics. Our party and its political values/policies promote social equality and believe this is achievable through promoting equal opportunity, an improved judicial/ justice structure and individual social responsibility.

Our policies advocate the reduction of the economic gap of all citizens and supports advanced policies in:

- Mixed economy of sustainable and accountable financial governance and a valuable growth focused relationship between government & private sector including starts-ups and domestic innovation,
- A social economic policy on national insurance that counteracts the effects poverty, insurance against loss of income, retirement, and access to healthcare for all,
- Government bodies that regulate private enterprise in the interests of workers and consumers by ensuring labor rights (e.g. supporting worker access to trade unions, workers participation, consumer protections and fair market competition).
- Mixed society mutually balanced between human and wildlife protections,
- Better government investments and spending around public works, infrastructure, education, and national security.

Our policies and foundations imply positions on the environment, religion, public morality, and a green ideology.

Thank you

The Democratic Union of Zimbabwe
